

Windtight and rainproof on the outside

Roof underlay membrane overlap

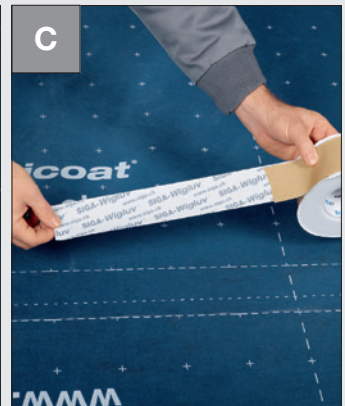

- Align Wigluv centrally along the overlap and secure in place
- Bond without tension and creases and press on firmly
- The printed bonding aid saves time

How it should look:

- The overlap is permanently windtightly sealed with Wigluv 60

Tips and tricks

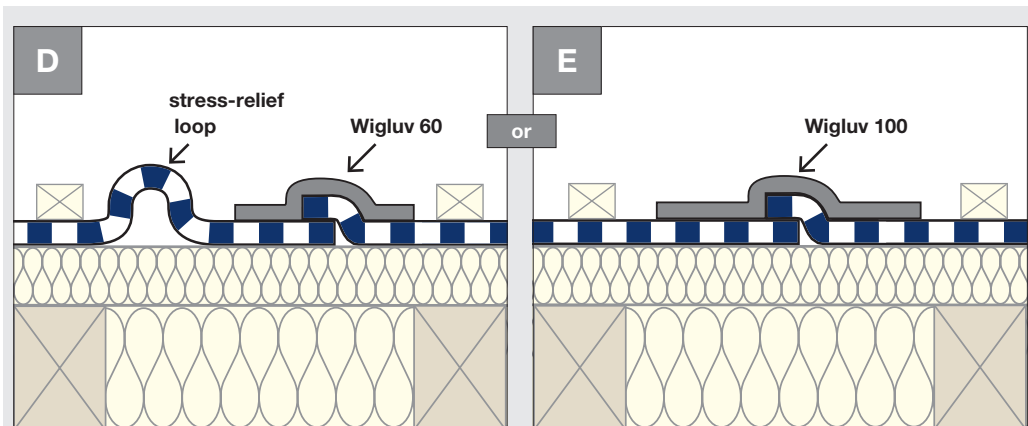

- Release Wigluv from its backing paper
- Unroll a turn of Wigluv so that the backing strip is at the top
- **Advantage:** backing strip separates automatically on unrolling

Roof

Windtight and rainproof on the outside

- Membranes show different expansion and shrinkage characteristics
- **Make a stress-relief loop in the membrane** or seal overlaps with **Wigluv 100** if:
 - the counter battens do not rest on the solid underlay with their complete surface or
 - the membrane is laid vertically
