

Product data sheet

SIGA - Wigluv® black

Updated on: 24/05/2018

Distributor: SIGA

**Application and
Installation instruction:** see manual

Construction: diffusion-open special PO film, elastic, impermeable to water, UV-stable, can be exposed to the atmosphere for 12 weeks, with SIGA high-performance adhesive

Packaging unit: 10 rolls / box

Characteristics:

| | | Standards | Units | Values |
|--|---|---------------------|-------------|-------------------|
| Dimensions | length / width | | m | 40 / 0.06 |
| Temperature resistance | | | °C | -40 °C to +100 °C |
| Processing temperature | | | °C | from -10 °C |
| Atmospheric exposure | | | weeks | max.12 |
| Diffusion-equivalent air layer thickness s_d | | EN 1931 | m | < 2 |
| Driving-rain-proof | Pmax. | EN 1027 EN 12208 | Pa class | 600 9A |
| Ageing resistance | high permanent adhesive strength, non-drying and non-embrittling since without caoutchouc, resin or solvent, can reliably and durably absorb structural movements | | | |
| Suitability for storage | unlimited store in a cool, dry place in its original box | | | |
